

BENEFITS OVERVIEW

New ProCARE Portal

The new ProCARE Portal elevates the user experience. The combination of enhanced functionality, faster performance, intuitive new UI, and advanced data visualizations culminates in a superior user experience. Users will find the system responsive, reliable and enjoyable to use.

Enhanced Functionality:

The upgraded system offers optimized functionality and a range of enhanced features that cater to user needs more effectively, streamline workflows and increase productivity. New feature enhancements include:

- ▶ Comp Elements module and functionality integrated into Custom Tables to expand the lookup capabilities for multiple hierarchies
- ▶ Job Scheduling enhancements to provide advanced scheduling options
- ▶ New Data Archiving feature to archive retired data and improve system performance
- ▶ New standalone modules for Audit Logs, Formula Master and Result Name Master to streamline workflows and increase productivity

Intelligent Data Analytics:

New data visualization and summary features provide users clearer insights and actionable information to enhance their decision-making.

Optimized Performance:

The newly designed system utilizes cutting-edge technologies and cloud infrastructure for accelerated data processing, optimized algorithms, and enhanced resource management, providing users with a smoother and more efficient experience.

Intuitive New UI:

The streamlined, redesigned user interface is not just visually appealing but also more user-friendly.

With a focus on simplicity and ease of use, the new UI reduces the learning curve, making it easier for both new and existing users to navigate and utilize the system effectively. For example, the KPI Type, Event Type and Result Type modules are now streamlined and linked to their associated objects (KPIs, Events, and Result Names).
